GENERAL WIRING INSTRUCTIONS

1) Switch off at the mains in order to isolate the area in which you intend to install your product

2) Ensure that there is sufficient length of mains cable / telephone cable / television cable to enable easy wiring, and not too much to make losing the excess length in the back of the product too difficult

3) Tighten the screw terminals onto the exposed wires (do not over–tighten) maintaining correct polarity using the easy to follow wiring diagrams for each individual product (identified by product model number).

POLARITY CONNECTIONS

BLUE (BLACK) TO N – NEUTRAL
GREEN / YELLOW (BARE EARTH WIRES) TO E – EARTH

Disclaimer

This equipment is intended for domestic use. It must be installed in accordance with the wiring installation instructions given. It must be fitted in the conventional way to a solid or stud partion wall. Wallpaper / wallpaper paste of any sort should not continue beneath the plate towards the working parts of the equipment.

The equipment should not be used in areas of high humidity (eg: bathrooms, swimming areas etc) nor within reach of a water source.

The equipment should be fitted to a mains supply of the appropriate voltage (indicated on the product). Care should be taken not to overload the equipment. No liability can be accepted if the product is installed contrary to any of the terms / instructions given.

If in any doubt whatsoever, you must consult a qualified electrician.
